

The First Genealogical Record: 10 Generations, Adam to Noah *Genesis 5*

* Likely, but not necessarily, this is a *compressed* genealogy, that is, not every intervening generation appears. Compressed genealogies occur elsewhere in Scripture (cf. Matthew 1:2-17). In Genesis 11, 10 generations again are listed for Shem to Abram (Abraham).

** AG¹ - means the era “After Genesis 1”; i.e., Enoch was taken 987 after Creation

*** Life spans decrease steadily after the Flood: 600 → 438 → 433 → 464 → 239
